HEXADIGITALL TECHNOLOGIES

OFFICIAL CURRICULUM GUIDE

Executive Agile Leadership & Transformation

Structured, hands-on learning path for Executive Agile Leadership & Transformation with detailed weekly outcomes and practical delivery.

DURATION **14 Weeks**	LEVEL **Advanced**	STUDY TIME **2 hours/week + labs**
SCHOOL **Hexadigitall Academy**	PREPARED ON **10 April 2026**	SOURCE **Executive Agile Leadership & Transformation**

PROGRAM SNAPSHOT

Executive Agile Leadership & Transformation

Structured, hands-on learning path for Executive Agile Leadership & Transformation with detailed weekly outcomes and practical delivery.

DURATION
14 Weeks

LEVEL
Advanced

STUDY TIME
2 hours/week + labs

SCHOOL
Hexadigitall Academy

14 Weeks | Advanced | Project-Based

Welcome to Executive Agile Leadership & Transformation!

This curriculum for Executive Agile Leadership & Transformation follows a Bloom-aligned progression from practical foundations to measurable professional outcomes, with weekly evidence, labs, and portfolio outputs matched to advanced expectations.

Each week advances from comprehension and application toward evaluation and creation, ensuring progressive learning and capstone readiness.

Your success is our priority. By the end, you will produce portfolio-ready artifacts and confidently explain your technical decisions. You will graduate with a professionally curated portfolio that demonstrates scope, depth, and delivery quality. You will graduate with a professionally curated portfolio that demonstrates scope, depth, and delivery quality. You will graduate with a professionally curated portfolio that demonstrates scope, depth, and delivery quality. You will graduate with a professionally curated portfolio that demonstrates scope, depth, and delivery quality.

Prerequisites

- Project management fundamentals: scope definition, stakeholder communication, and timeline estimation accuracy
- Business analysis skills: requirements gathering, user story crafting, and acceptance criteria specification
- Process mapping and workflow redesign experience with focus on efficiency and stakeholder value
- Familiarity with project management tools (Jira, Asana, Monday) and kanban board optimization

Essential Resources

- Project Charter template, WBS examples, and stakeholder analysis worksheets
- Risk register, change log, and lessons learned repository templates
- ROI calculation models, benefits tracking dashboards, and governance frameworks

Complementary Courses

Agile & Scrum Leadership

Master sprint planning, retrospectives, and team coaching techniques

Strategic Planning & Change Management

Learn enterprise roadmap alignment, change impact, and transformation communication

Business Analysis & Data-Driven Decision Making

Deepen market research, competitive analysis, and ROI modeling

Learning Roadmap

- Early Weeks: Project fundamentals, planning, and stakeholder management
- Middle Weeks: Execution excellence, risk management, and adaptive strategies
- Late Weeks: Delivery validation, lessons learned, and strategic impact

Detailed Weekly Curriculum

WEEK 1

2 hours + labs

Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1)

LEARNING OUTCOMES

- Analyze the principles of Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Evaluate Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1) in a guided scenario using realistic tools, constraints, and quality gates.
- Design trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1) with measurable success criteria and next actions.

LAB EXERCISE

- Design and execute a concrete Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1) build in Executive Agile Leadership & Transformation with a clear acceptance checklist.
- Validate Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1) with objective tests and quality controls before review.
- Deliver Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1) artifacts with reproducible steps and operational notes.

WEEK 2

2 hours + labs

Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1)

LEARNING OUTCOMES

- Analyze the principles of Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Evaluate Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1) in a guided scenario using realistic tools, constraints, and quality gates.
- Design trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1) with measurable success criteria and next actions.

LAB EXERCISE

- Produce a complete Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1) prototype from brief to high-fidelity handoff artifacts.
- Run usability/visual QA for Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1) and apply iteration changes from feedback.
- Deliver export-ready assets, source files, and implementation notes for Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1).

WEEK 3

2 hours + labs

Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1)

LEARNING OUTCOMES

- Analyze the principles of Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Evaluate Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1) in a guided scenario using realistic tools, constraints, and quality gates.
- Design trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1) with measurable success criteria and next actions.

LAB EXERCISE

- Produce a complete Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1) prototype from brief to high-fidelity handoff artifacts.
- Run usability/visual QA for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1) and apply iteration changes from feedback.
- Deliver export-ready assets, source files, and implementation notes for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1).

WEEK 4

2 hours + labs

Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 1)

LEARNING OUTCOMES

- Analyze the principles of Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 1) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Evaluate Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 1) in a guided scenario using realistic tools, constraints, and quality gates.
- Design trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 1), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 1) with measurable success criteria and next actions.

LAB EXERCISE

- Design and execute a concrete Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 1) build in Executive Agile Leadership & Transformation with a clear acceptance checklist.
- Validate Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 1) with objective tests and quality controls before review.
- Deliver Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 1) artifacts with reproducible steps and operational notes.

WEEK 5

2 hours + labs

Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1)

LEARNING OUTCOMES

- Analyze the principles of Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Evaluate Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1) in a guided scenario using realistic tools, constraints, and quality gates.
- Design trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1) with measurable success criteria and next actions.

LAB EXERCISE

- Design and execute a concrete Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1) build in Executive Agile Leadership & Transformation with a clear acceptance checklist.
- Validate Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1) with objective tests and quality controls before review.
- Deliver Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1) artifacts with reproducible steps and operational notes.

WEEK 6

2 hours + labs

Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1)

LEARNING OUTCOMES

- Evaluate the principles of Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Design Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1) in a guided scenario using realistic tools, constraints, and quality gates.
- Optimize trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1) with measurable success criteria and next actions.

LAB EXERCISE

- Implement baseline controls for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1) and verify enforcement on target systems.
- Run assessment/scanning for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1) and prioritize findings by exploitability and impact.
- Close critical findings for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1) and publish re-test evidence.

WEEK 7

2 hours + labs

Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1)

LEARNING OUTCOMES

- Evaluate the principles of Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Design Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1) in a guided scenario using realistic tools, constraints, and quality gates.
- Optimize trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1) with measurable success criteria and next actions.

LAB EXERCISE

- Design and execute a concrete Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1) build in Executive Agile Leadership & Transformation with a clear acceptance checklist.
- Validate Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1) with objective tests and quality controls before review.
- Deliver Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1) artifacts with reproducible steps and operational notes.

WEEK 8

2 hours + labs

Executive Agile Leadership & Transformation: Continuous Improvement and Scale (Sprint 1)

LEARNING OUTCOMES

- Evaluate the principles of Executive Agile Leadership & Transformation: Continuous Improvement and Scale (Sprint 1) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Design Executive Agile Leadership & Transformation: Continuous Improvement and Scale (Sprint 1) in a guided scenario using realistic tools, constraints, and quality gates.
- Optimize trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Continuous Improvement and Scale (Sprint 1), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Continuous Improvement and Scale (Sprint 1) with measurable success criteria and next actions.

LAB EXERCISE

- Design and execute a concrete Executive Agile Leadership & Transformation: Continuous Improvement and Scale (Sprint 1) build in Executive Agile Leadership & Transformation with a clear acceptance checklist.
- Validate Executive Agile Leadership & Transformation: Continuous Improvement and Scale (Sprint 1) with objective tests and quality controls before review.
- Deliver Executive Agile Leadership & Transformation: Continuous Improvement and Scale (Sprint 1) artifacts with reproducible steps and operational notes.

WEEK 9

2 hours + labs

Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 2)

LEARNING OUTCOMES

- Evaluate the principles of Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 2) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Design Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 2) in a guided scenario using realistic tools, constraints, and quality gates.
- Optimize trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 2), then record rationale for stakeholder review.
- Justify a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 2) with measurable success criteria and next actions.

LAB EXERCISE

- Design and execute a concrete Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 2) build in Executive Agile Leadership & Transformation with a clear acceptance checklist.
- Validate Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 2) with objective tests and quality controls before review.
- Deliver Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 2) artifacts with reproducible steps and operational notes.

WEEK 10

2 hours + labs

Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 2)

LEARNING OUTCOMES

- Design the principles of Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 2) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Optimize Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 2) in a guided scenario using realistic tools, constraints, and quality gates.
- Architect trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 2), then record rationale for stakeholder review.
- Defend a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 2) with measurable success criteria and next actions.

LAB EXERCISE

- Produce a complete Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 2) prototype from brief to high-fidelity handoff artifacts.
- Run usability/visual QA for Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 2) and apply iteration changes from feedback.
- Deliver export-ready assets, source files, and implementation notes for Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 2).

WEEK 11

2 hours + labs

Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2)

LEARNING OUTCOMES

- Design the principles of Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Optimize Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2) in a guided scenario using realistic tools, constraints, and quality gates.
- Architect trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2), then record rationale for stakeholder review.
- Defend a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2) with measurable success criteria and next actions.

LAB EXERCISE

- Produce a complete Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2) prototype from brief to high-fidelity handoff artifacts.
- Run usability/visual QA for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2) and apply iteration changes from feedback.
- Deliver export-ready assets, source files, and implementation notes for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2).

WEEK 12

2 hours + labs

Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2)

LEARNING OUTCOMES

- Design the principles of Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Optimize Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2) in a guided scenario using realistic tools, constraints, and quality gates.
- Architect trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2), then record rationale for stakeholder review.
- Defend a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2) with measurable success criteria and next actions.

LAB EXERCISE

- Design and execute a concrete Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2) build in Executive Agile Leadership & Transformation with a clear acceptance checklist.
- Validate Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2) with objective tests and quality controls before review.
- Deliver Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2) artifacts with reproducible steps and operational notes.

WEEK 13

2 hours + labs

Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2)

LEARNING OUTCOMES

- Design the principles of Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Optimize Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2) in a guided scenario using realistic tools, constraints, and quality gates.
- Architect trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2), then record rationale for stakeholder review.
- Defend a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2) with measurable success criteria and next actions.

LAB EXERCISE

- Design and execute a concrete Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2) build in Executive Agile Leadership & Transformation with a clear acceptance checklist.
- Validate Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2) with objective tests and quality controls before review.
- Deliver Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2) artifacts with reproducible steps and operational notes.

WEEK 14

2 hours + labs

Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 2)

LEARNING OUTCOMES

- Design the principles of Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 2) and link them to course outcomes at advanced depth with architecture-level decision quality.
- Optimize Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 2) in a guided scenario using realistic tools, constraints, and quality gates.
- Architect trade-offs, risks, and decision points for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 2), then record rationale for stakeholder review.
- Defend a portfolio-ready delivery strategy memo for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 2) with measurable success criteria and next actions.

LAB EXERCISE

- Implement baseline controls for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 2) and verify enforcement on target systems.
- Run assessment/scanning for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 2) and prioritize findings by exploitability and impact.
- Close critical findings for Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 2) and publish re-test evidence.

Capstone Projects

Project 1: Executive Agile Leadership & Transformation Foundation Build

Deliver a concrete foundation implementation covering the first phase of the curriculum.

- Implement and validate Executive Agile Leadership & Transformation: Domain Foundations and Problem Definition (Sprint 1).
- Integrate Executive Agile Leadership & Transformation: Stakeholder Discovery and Requirements (Sprint 1) with reusable workflow standards.
- Publish evidence for Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 1) with test and quality artifacts.

Project 2: Executive Agile Leadership & Transformation Integrated Systems Build

Combine mid-program competencies into a production-style integrated workflow.

- Build an end-to-end flow around Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 1) and Executive Agile Leadership & Transformation: Risk and Governance Controls (Sprint 1).
- Add controls, observability, and rollback paths for reliability.
- Document architecture decisions and trade-offs tied to Executive Agile Leadership & Transformation: Program Execution and Cadence (Sprint 1).

Project 3: Executive Agile Leadership & Transformation Capstone Delivery

Ship a portfolio-ready capstone with measurable outcomes and stakeholder-ready presentation.

- Deliver a complete implementation centered on Executive Agile Leadership & Transformation: Process Mapping and Workflow Design (Sprint 2).
- Validate readiness for Executive Agile Leadership & Transformation: Decision Frameworks and Trade-offs (Sprint 2) using objective acceptance checks.
- Present final defense and roadmap based on Executive Agile Leadership & Transformation: Reporting and Communication Excellence (Sprint 2) outcomes.

This curriculum is an official Hexadigitall learning plan. Module sequencing and project details may be refined as industry requirements evolve.
